

## Gildemeister a+f components GmbH is acquired by Elcee Group

Dordrecht/Würzburg, December 4th 2017

*Gildemeister a+f components GmbH from Würzburg, a former business unit of GILDEMEISTER energy solutions GmbH (part of the listed company DMG MORI AG), was acquired by Elcee Group, Dordrecht, the Netherlands.*

The Elcee Group, with headquarters in Dordrecht, the Netherlands (founded in 1923), is an industrial technical supplier for the industrial market, with a clear focus on Castings & Forgings, Plain Bearings and Fasteners. Due to a dynamic and stable growth, an annual turnover of ca. 95 million Euro with ca. 300 employees is achieved ([www.elcee.nl](http://www.elcee.nl)).

Elcee has an extremely efficient procurement and has its own mechanical manufacturing to its disposal in Asia. In order to strengthen the business in Germany and to expand the procurement in Europe and, in particular, on the East-European markets, Elcee Deutschland GmbH has been set up at two locations in the past few years.

Due to the strategic takeover of Gildemeister a+f components GmbH (abbreviated to: a+f components), based in Würzburg, the presence on the German market will be further reinforced and its product range will also be further expanded.

Gildemeister a+f components GmbH will keep its headquarters in Würzburg and all the employees of a+f components will remain: the well-known contact persons will still be at your disposal.

Elcee and a+f components share the common goal of providing you the most comprehensive range of castings, forgings, plain bearings and stainless steel fasteners. For you as our customer nothing will change in the operational process. All services will remain at the same high quality level. Together we can offer you a significant competitive advantage. In our warehouse near Rotterdam, our stock, representing goods with a value of more than 15 million is available on demand at any time.

After the acquisition, the business and supplier relationships with the DMG MORI Group will continue to exist and will be expanded strategically. We would like to express our gratitude to the Management Board of the DMG Mori AG and the Gildemeister energy solutions GmbH for the very pleasant and constructive conversations.

If you have any questions, or if you require further explanation, please feel free to contact us. We look forward to the future cooperation.
